Striking Confirmation of the Accuracy of the Bible.

A very singular and striking confirmation of the truth of certain ancient Bible records has lately been brought to light. The land of Moab, lying east of the Jordan and Dead Sea, being under Turkish rule, and the authorities being jealous of all the movements of travelers, has been a land of mystery, and few and far between have been explorations of it. In 1868 Rev. F. A. Klien, a Prussian missionary at Jerusalem, traveling in Moab, under the protection of an Arab sheigh, discovered a remarkable stone among the rules of the ancient city of Dibon. The stone was originally three feet and five inches in hight, and one foot and nine inches in width and thickness with an incription of thirty-four lines.

It is believed that originally there were 1100 letters on the stone, but only 669 have been restored, as it was partially broken in pieces after curical to a remark able of the Arabs partially broken in pieces after curical to a remark able of the Arabs.

their triends will attend. The spring shickens and the fine fat turkles are all ready to
be prepared for the bountiful support to be
spread on the occasion.
